Education

Saint Petersburg State University – Faculty of Math and Mechanics   Sep. 2017 – Jul. 2021

BSc, Computer Science and Software, GPA 4.96/5.00, with honors   *Saint Petersburg, Russia*

Activities: volunteer of the faculty student council, Freshmen Buddy program member

Experience

Software Engineer, Itiviti, a Broadridge Business   May 2021 – present

High Availability team, Tbricks platform   *Saint Petersburg, Russia*

- Implemented a platform log analysis tool; 30+ major bugs were found using the tool
- Developed platform configuration exporting app;
  The app was deployed to a number of major clients, including a top-tier investment bank
- Participated in Hashicorp Consul integration in place of legacy in-house Zeroconf/mDNS implementation

Researcher, JetBrains Research   Oct. 2019 – Jun. 2021

Partial evaluation research in Programming Languages and Tools lab   *Saint Petersburg, Russia*

- Implemented experiments on partial evaluation (C++, CUDA/OpenCL, custom DSLs and LLVM IR)
- Developed benchmarks on graph algorithms performance (SuiteSparse GraphBLAS)
- Modified Clang slightly for partial evaluation framework support
- Finishing a bachelor thesis "Partial Evaluation Of Linear Algebra Algorithms" and a paper for SYRCoSE

Projects

TRIK Gamepad Android application modification   Jun. 2019 – Aug. 2019

Google Play

- Implemented several new screens and remade networking code
- Covered code with different types of tests
- Connected with Circle CI
- My code was integrated into the production TRIK Gamepad code

Testing system for TRIK robots programs   Feb. 2019 – Jun. 2019

Github

- Connected TRIK robot simulator with Travis CI
- Implemented an ability to use simulator as a cloud-based testing system
- The system was lately applied for different TRIK tools testing

Google Drive integration plugin for REAL.NET visual programming environment   Sep. 2018 – Dec. 2018

Github

- Implemented .NET-based plugin with a file manager functionality
- Connected the plugin with Google Drive
- The plugin received positive reviews from polled fellow students

Skills

Programming Languages and Technologies:

- C/C++, SQL, Git (medium)
- Python, Linux, Docker, CUDA/OpenCL, Java/Kotlin, .NET stack (some experience)
- Haskell, LLVM, x86 (familiarity)

Languages:

- Russian (Native)
- English (B2, Upper Intermediate)
